Windows 365 App

Windows 365 for shift and part-time employees

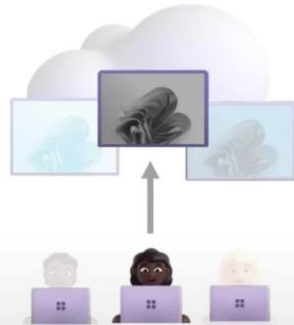

A model for shift and part-time work

Empower employees with the type of Cloud PC they need to work productively.

Dedicated Cloud PC

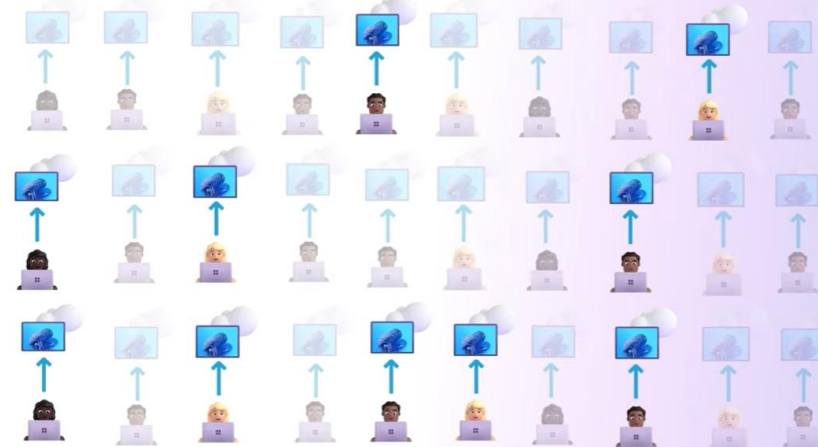

- 1 Cloud PC for 1 employee
- Personalized, full Windows
- Access 24/7

Cloud PC for shift work

- Cloud PC access for groups of employees
- Personalized, full Windows
- Access only when they need it – during their shift

Cloud PCs at scale with a shared license

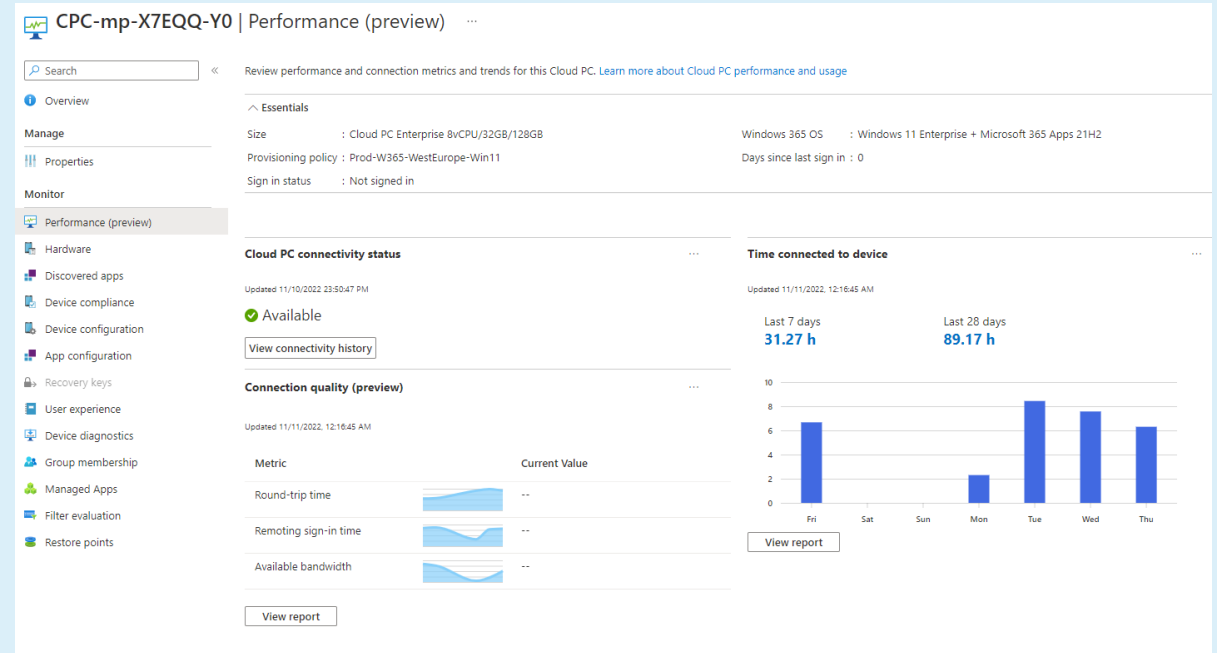

Any 10 of the 30 workers can use Cloud PCs at the same time

Cloud PCs turn on when user logs in and automatically shuts down when the user logs off

Performance and alerts

Place this Cloud PC under review?

Windows 365

When a Cloud PC is placed under review, a new restore point will be created to preserve the process and network status. [Learn more about Cloud PC reviews](#)

Share to a storage account

A copy of this restore point can be placed in your secure Azure storage account so it can be shared with the forensic team. If you don't wish to share this now, you can always share it later.

citrix™

Allow members of your organization to connect to their Cloud PCs using the HDX protocol from Citrix.

Turning off the connector will end any active sessions using Citrix. The Citrix agent will uninstall from all Cloud PCs.

1. Set up and deploy the Windows 365 connector from your Citrix Cloud console.
[Learn more about setting up the Windows 365 Citrix connector.](#)
2. Allow people to use Citrix to connect to their Cloud PCs.
