• Old name: "Microsoft Endpoint Manager (MEM)".

• New name: "Microsoft Intune".

• New name: "Microsoft Configuration Manager".

Coming soon

Upgrade to Windows 11
from Windows 10 with
Windows Autopatch

Advanced Endpoint Management Suit 2023!

Launch Capabilities

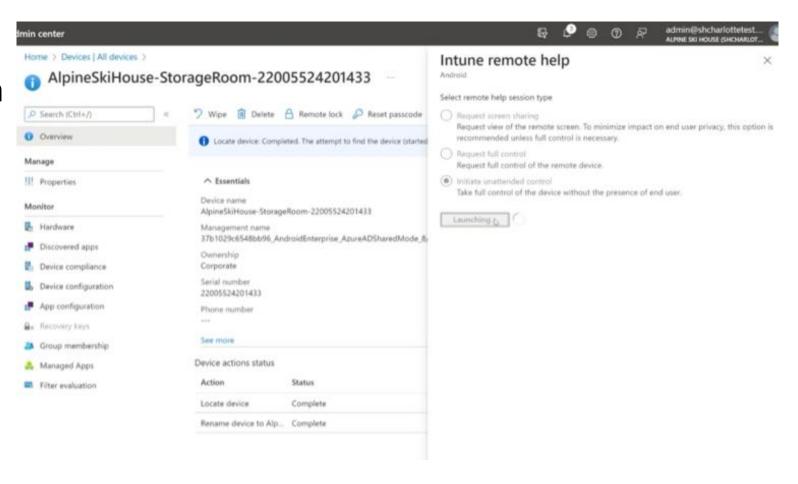

- Remote Help
- Endpoint Privilege Management
- Microsoft Tunnel for mobile application management (MAM)
- Support for multiple corporate accounts on a single device
- Advanced endpoint analytics

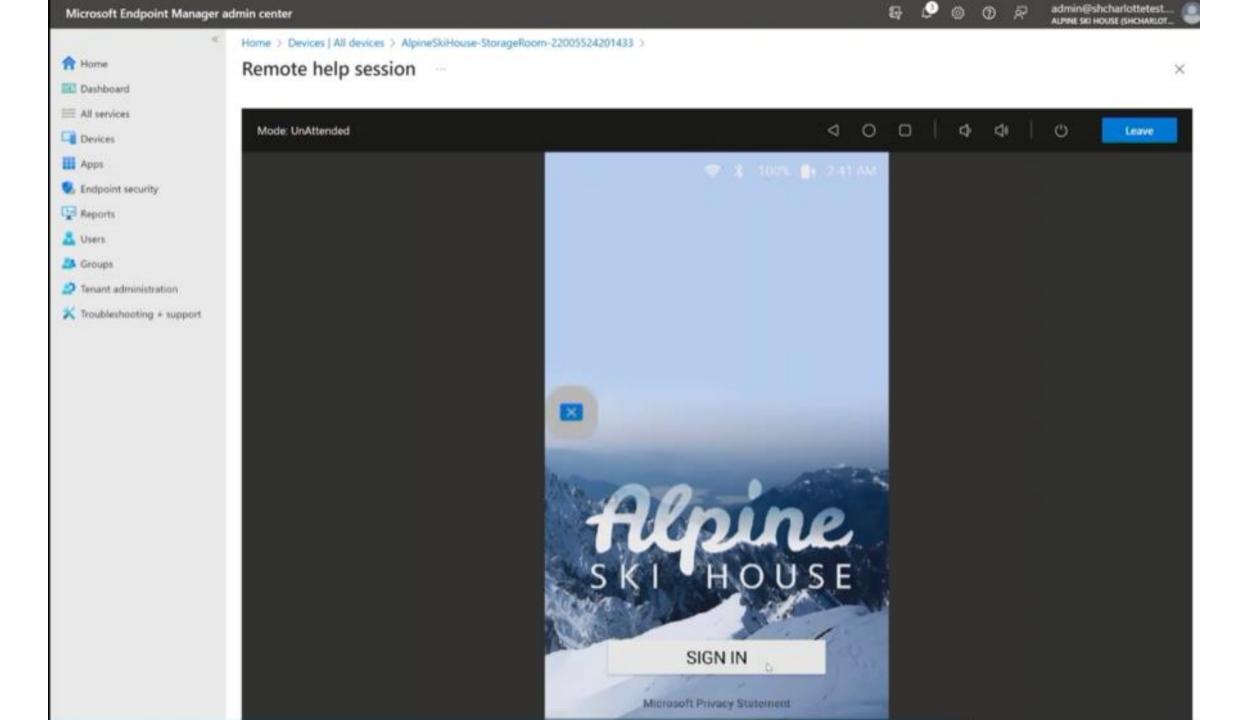

Do more with less

Remote Help

- Improved Windows options
- Support for Android
- ServiceNow integration

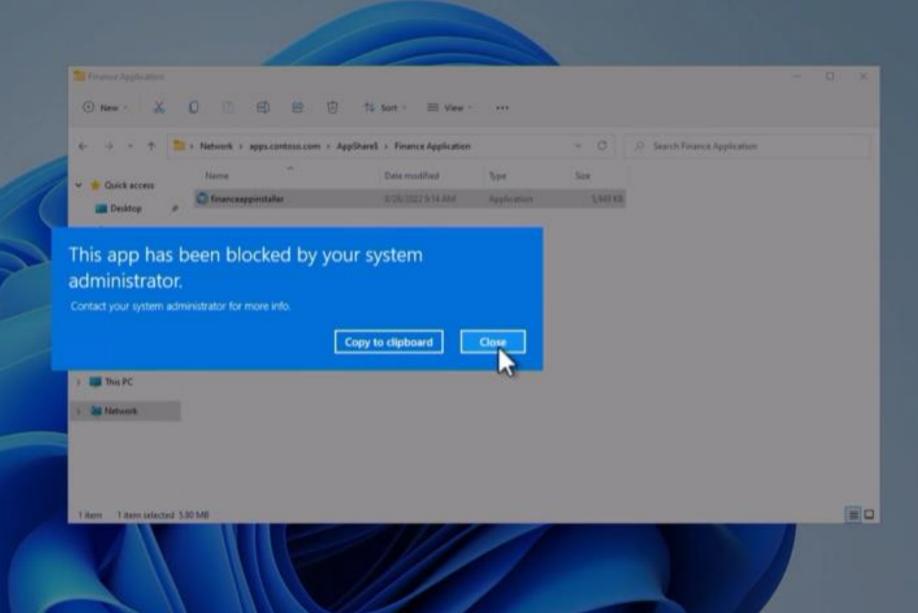

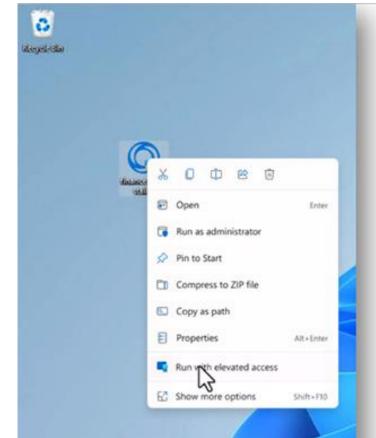

Endpoint Privilege Management (EPM)

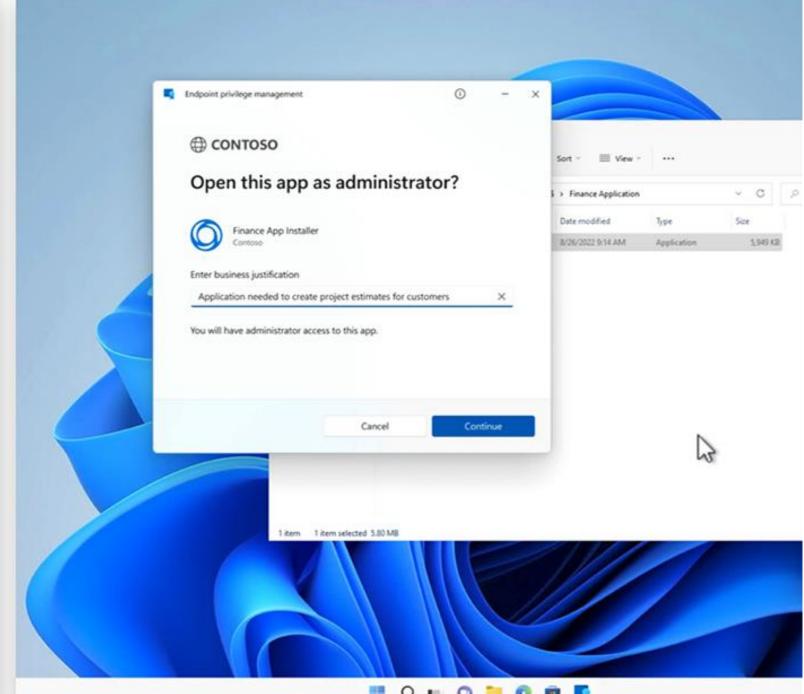

• Automates and manages when employees receive elevated admin permissions on Windows.

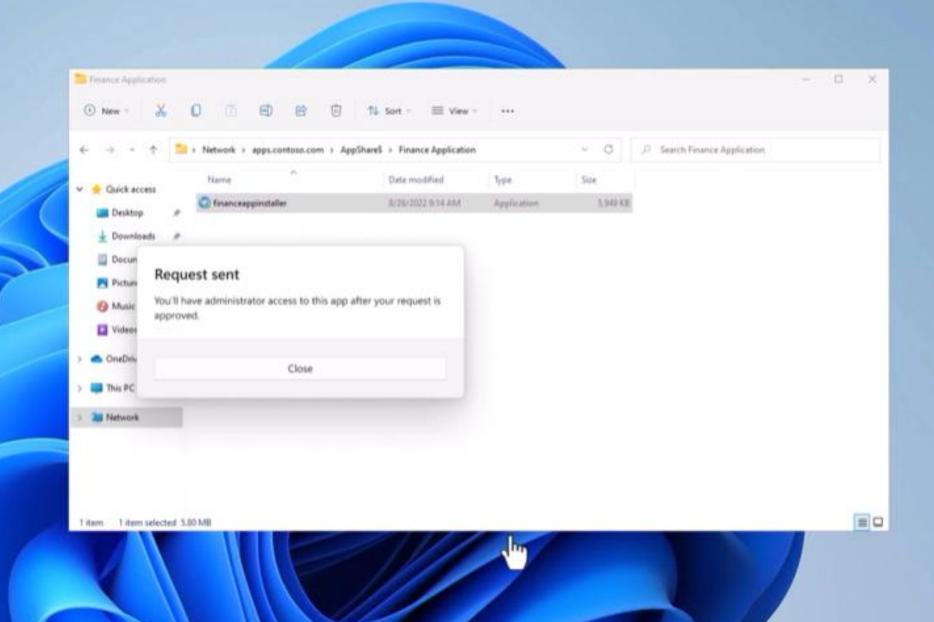

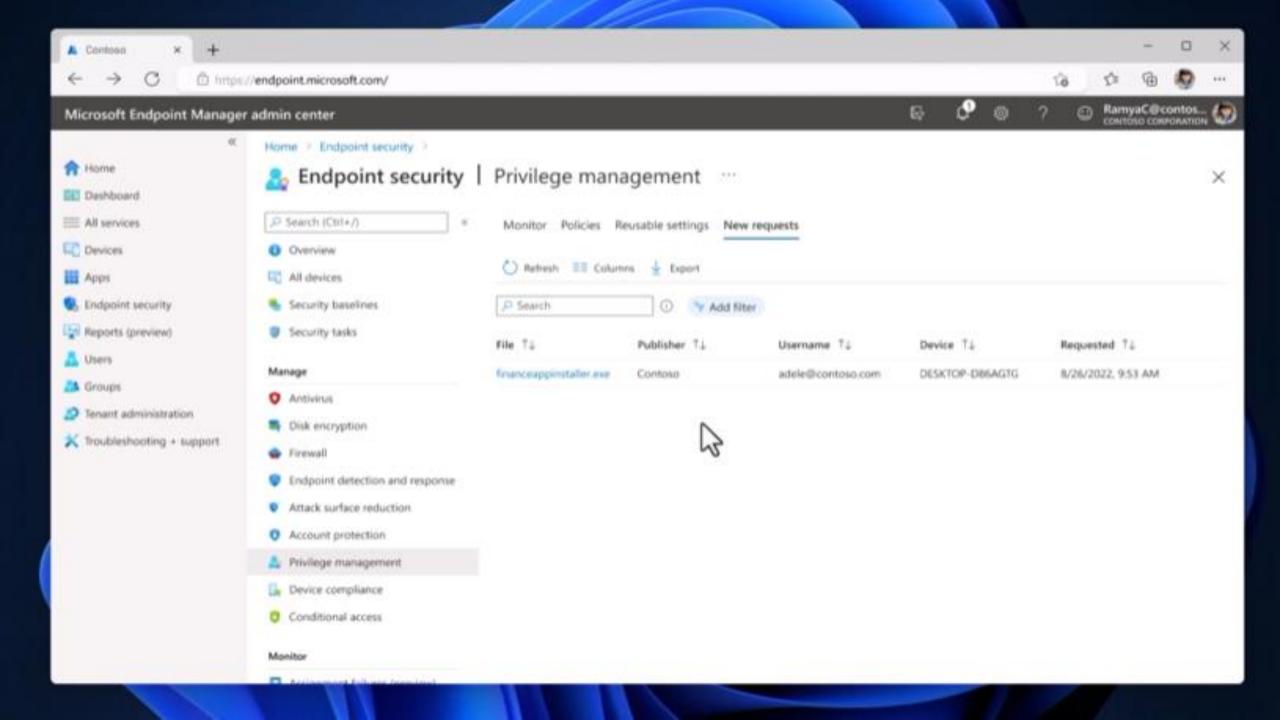

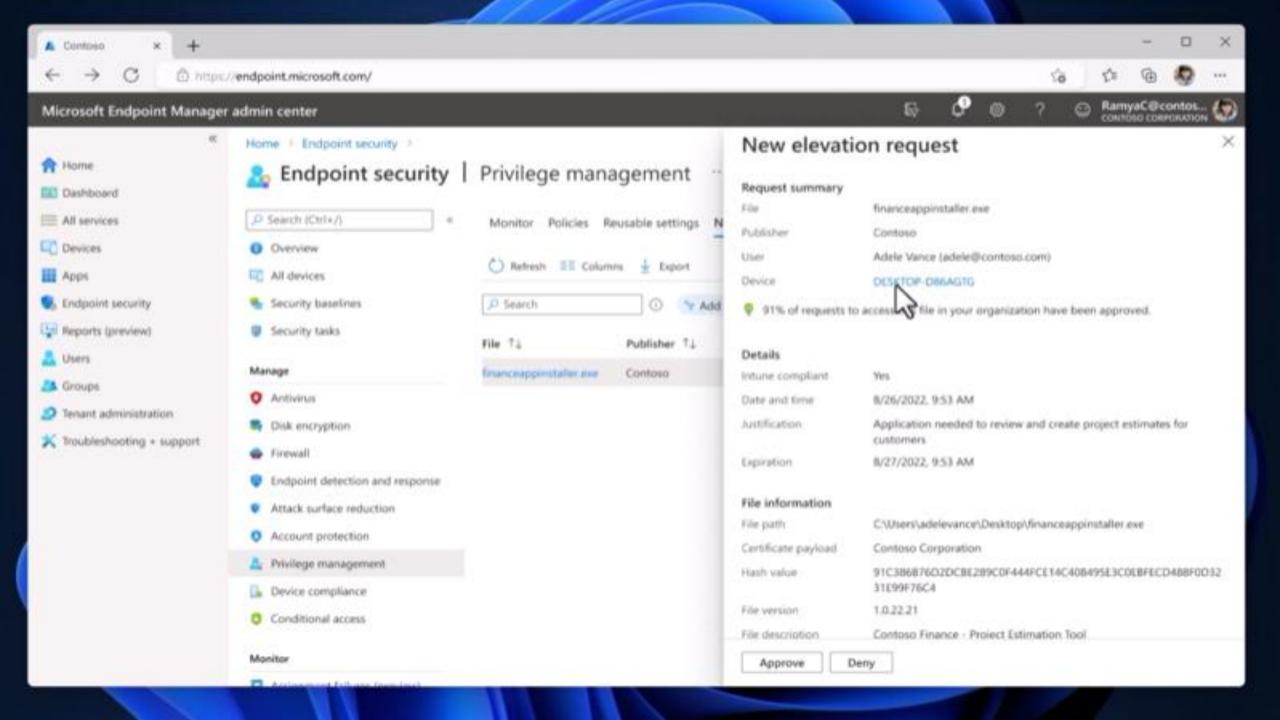

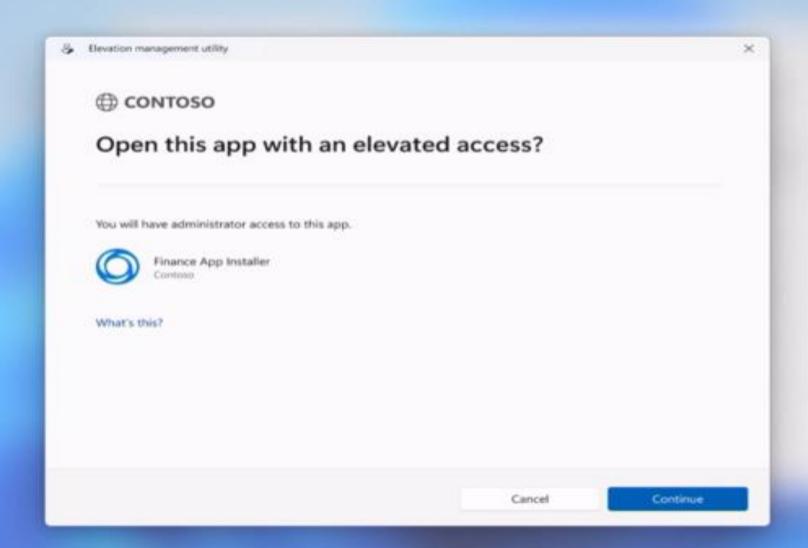

Multi account MAM

• Support for multiple accounts on an endpoint

Scenario (example):

Consultant/Freelancer with multiple customers

Microsoft Tunnel for Mobile (MAM)

• Expands on managed device capabilities to bring support for unmanaged as well...

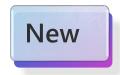

Advanced Endpoint Analytics

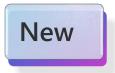

- Using Al and data science to power better experiences
- New anomaly early detection of unexpected reboots, app crash and hardware failures
- On-demand proactive remediation execution

Better Experiences with Endpoint analytics

Intelligent Recomendations

Recommended configurations for optimizing security and endpoint experience

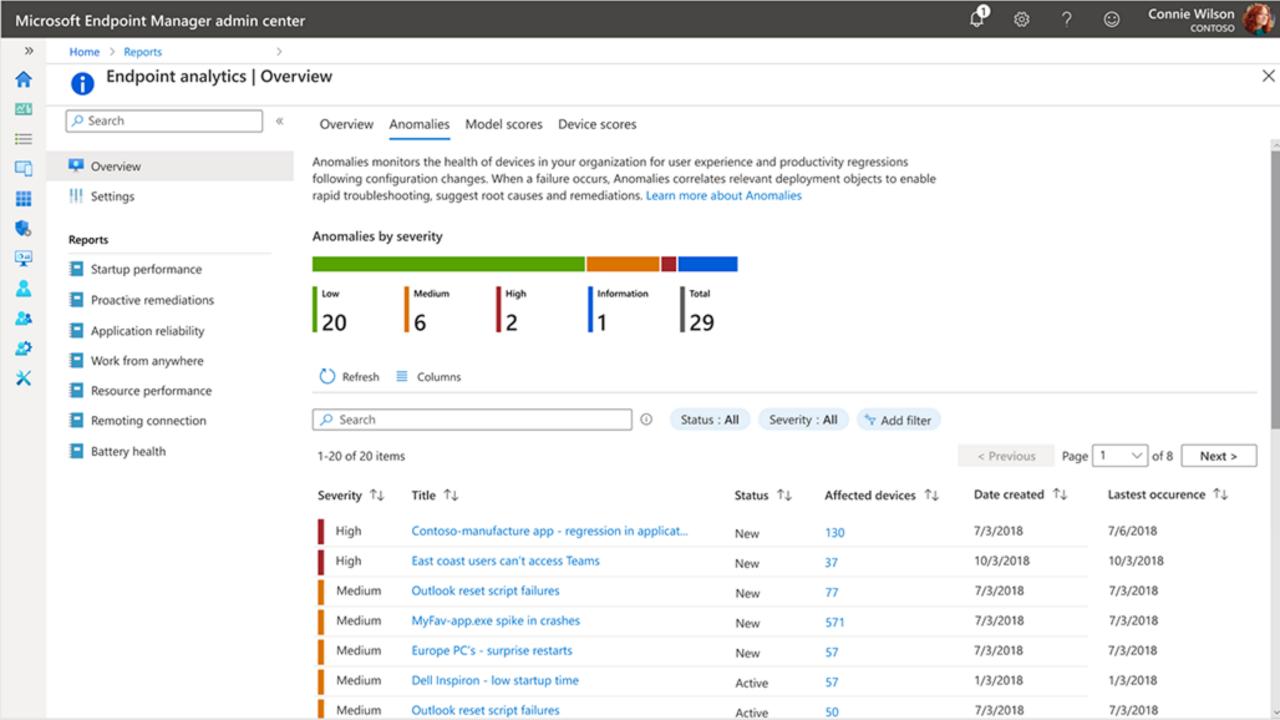

Anomaly Detection

Identify and remediate issues before they impact employee productivity

Increased automation with AI to deliver on Microsoft's vision for autonomous endpoint management value

Launch

- New premium plan to subscribers of Microsoft 365 E3 and E5.
 - (Or any plan which today includes licenses for Microsoft Intune)
- Individual solutions will be available as standalone add-ons.
 - New plan will be available for less than the sum of all the add-ons.
- Expected GA: March 2023.

- Control of what drivers, to what device and when.
- Now: Limited Private Preview in Intune
- Currently building the report for Drivers
- Public release is estimated for Q2 2023

Linux Support in Microsoft Intune

- Enroll personal Linux devices in Microsoft Intune to get secure access to work or school resources in Microsoft Edge.
- Support for Ubuntu Desktop 22.04 or 20.04 LTS
- Compliance Policies to support Conditional Access and Zero Trust.

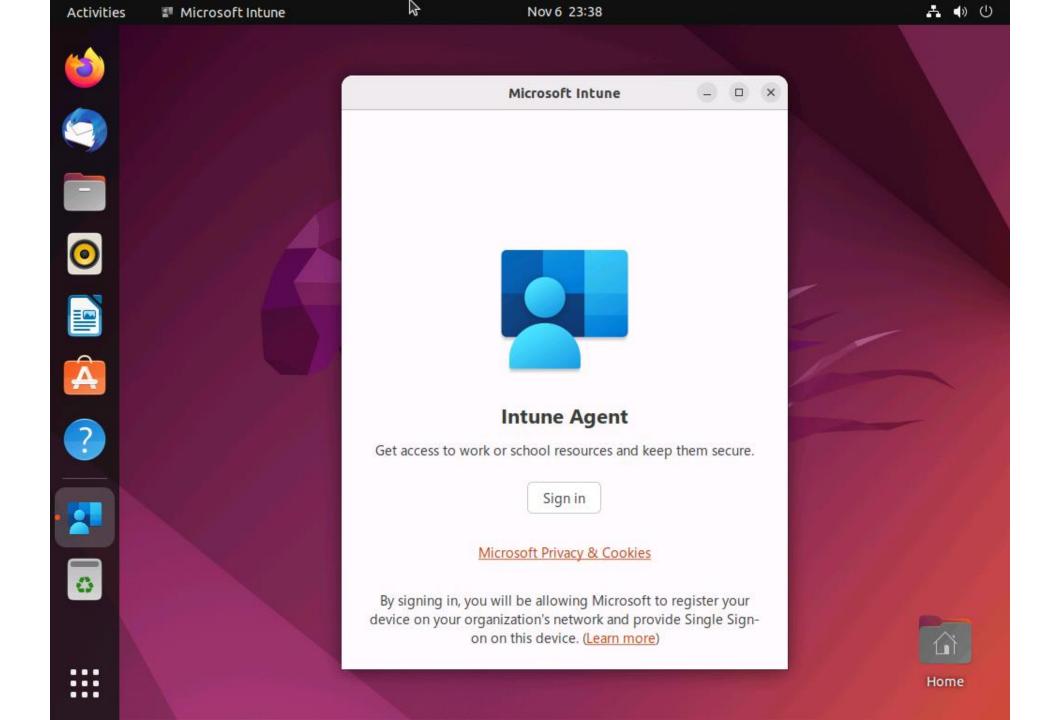

• Steps:

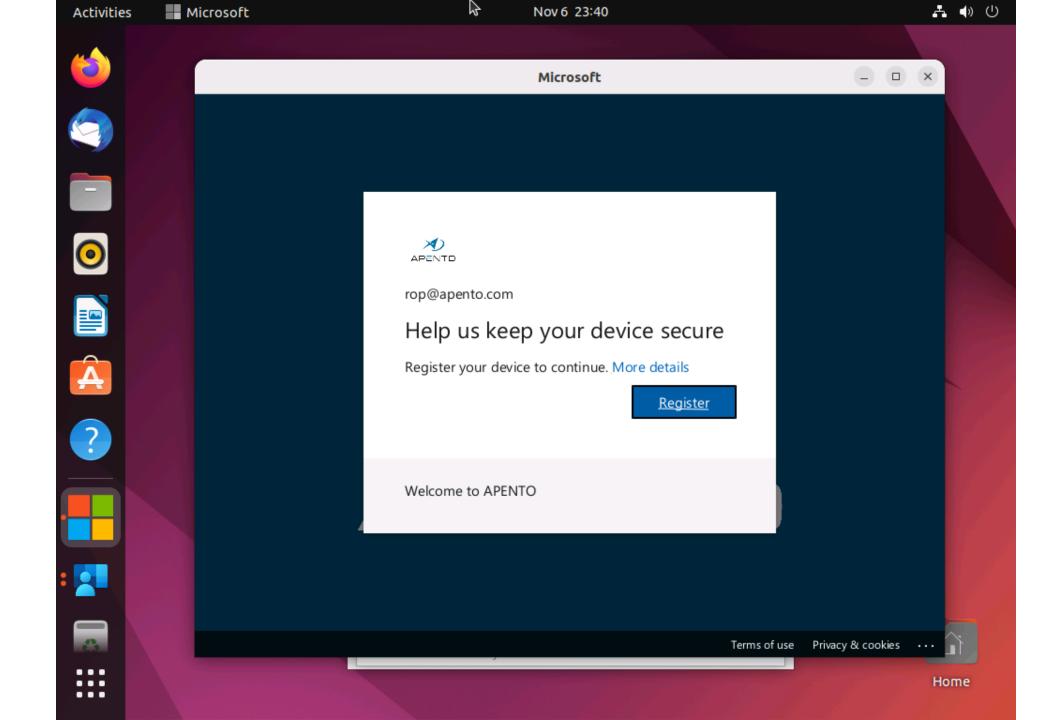

- 1. Install Microsoft Edge
- 2. Install the Microsoft Intune App
- 3. Enroll using Intune App

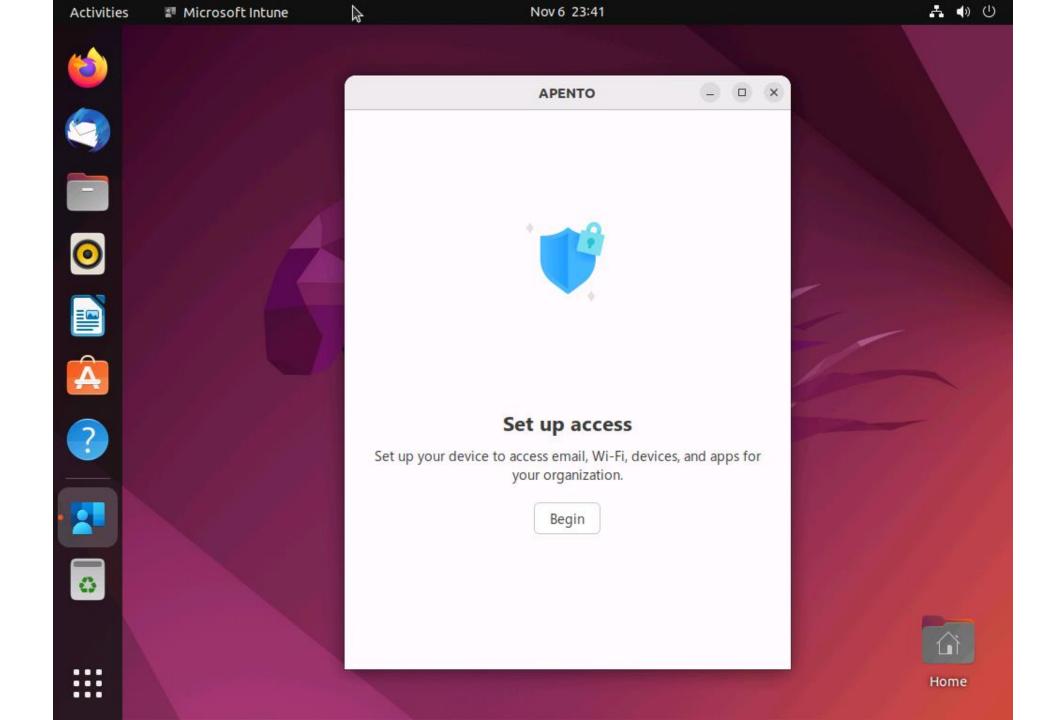

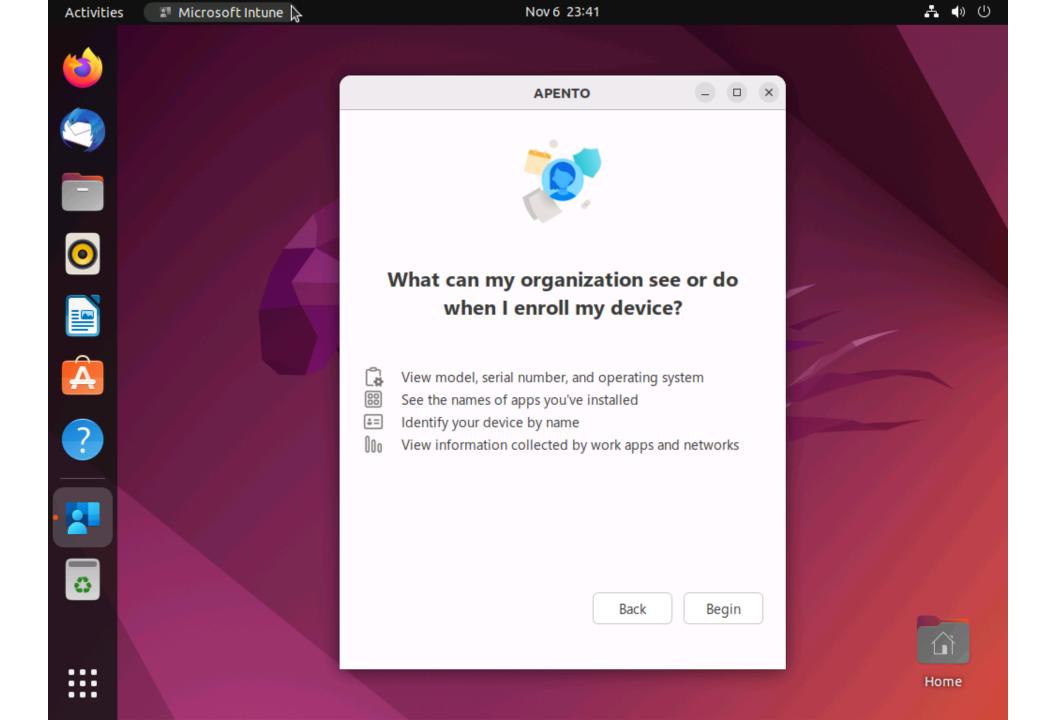

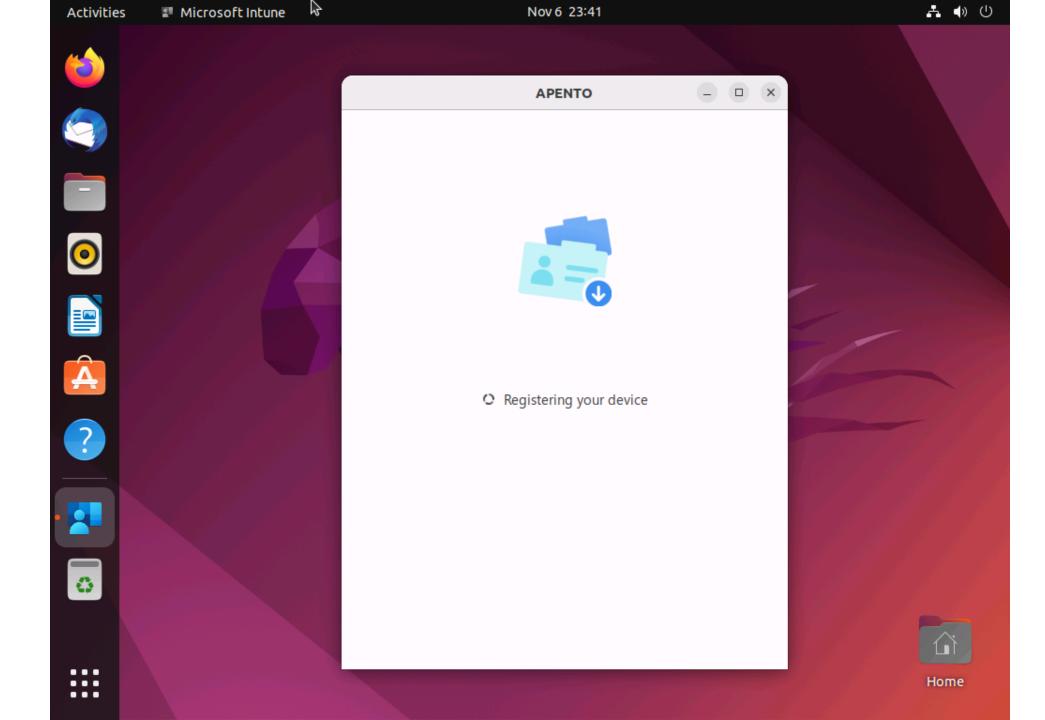

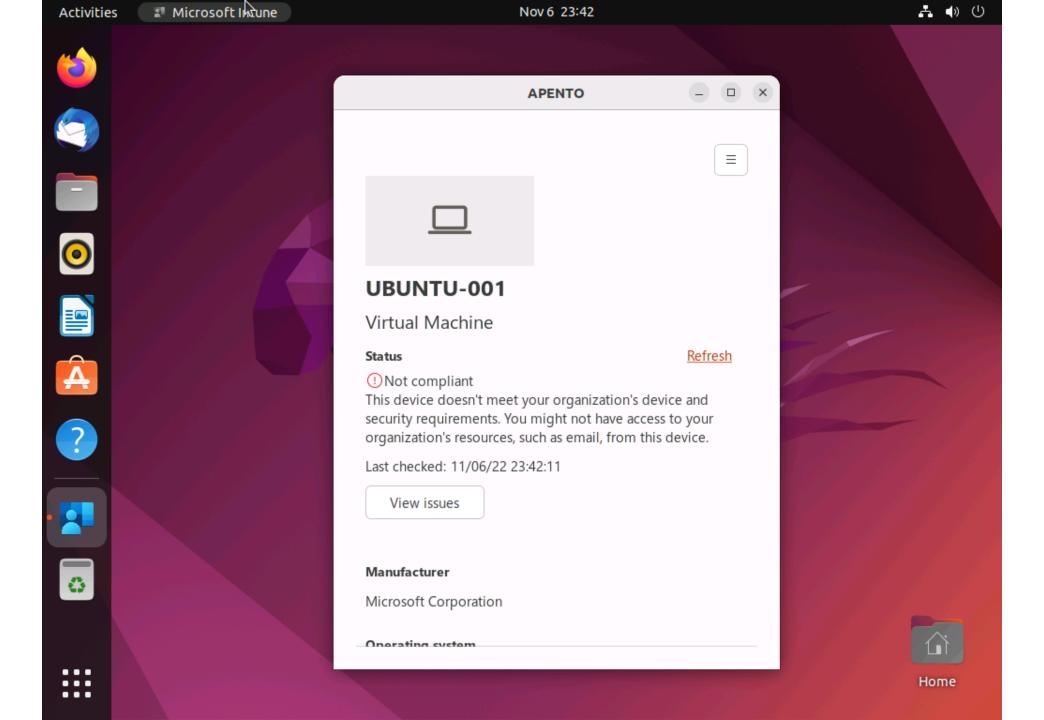

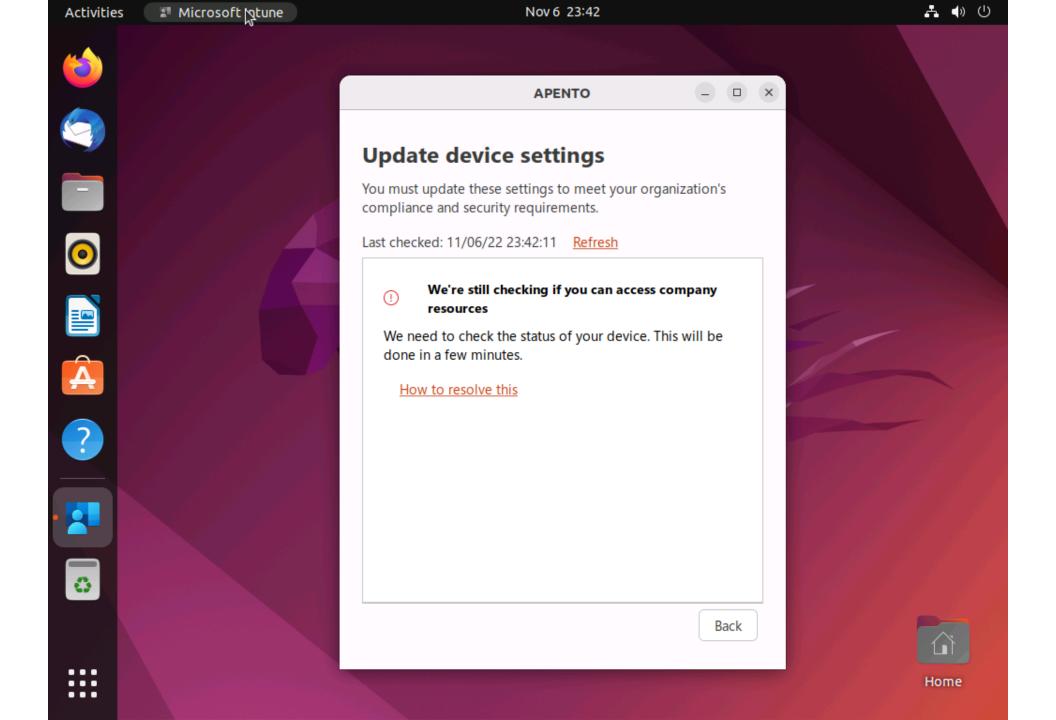

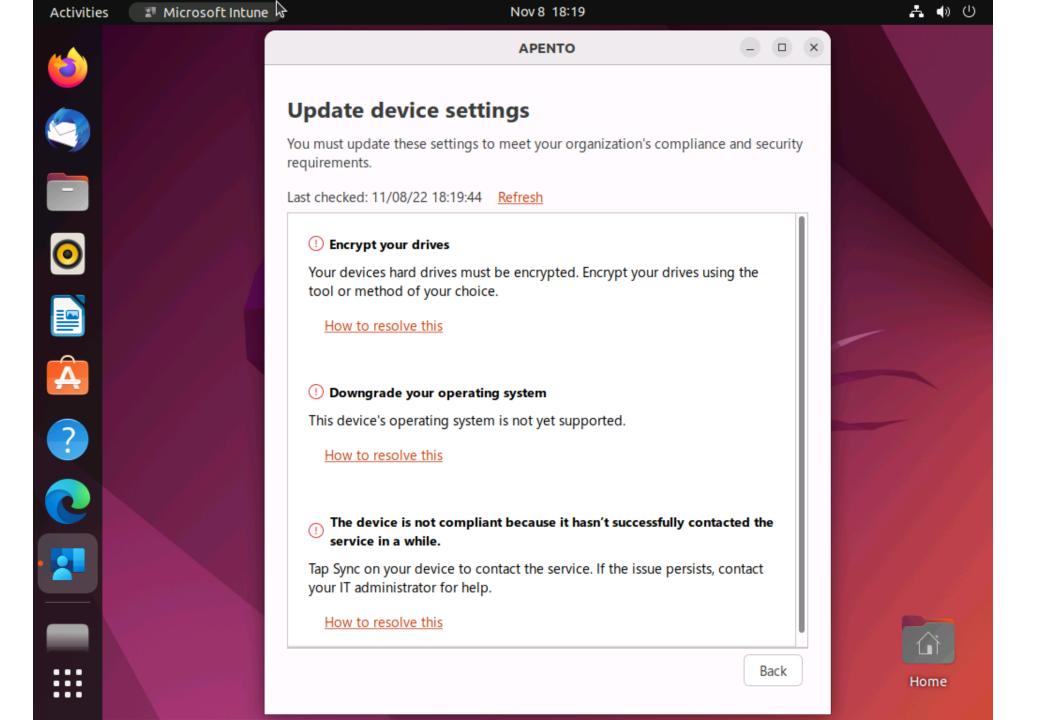

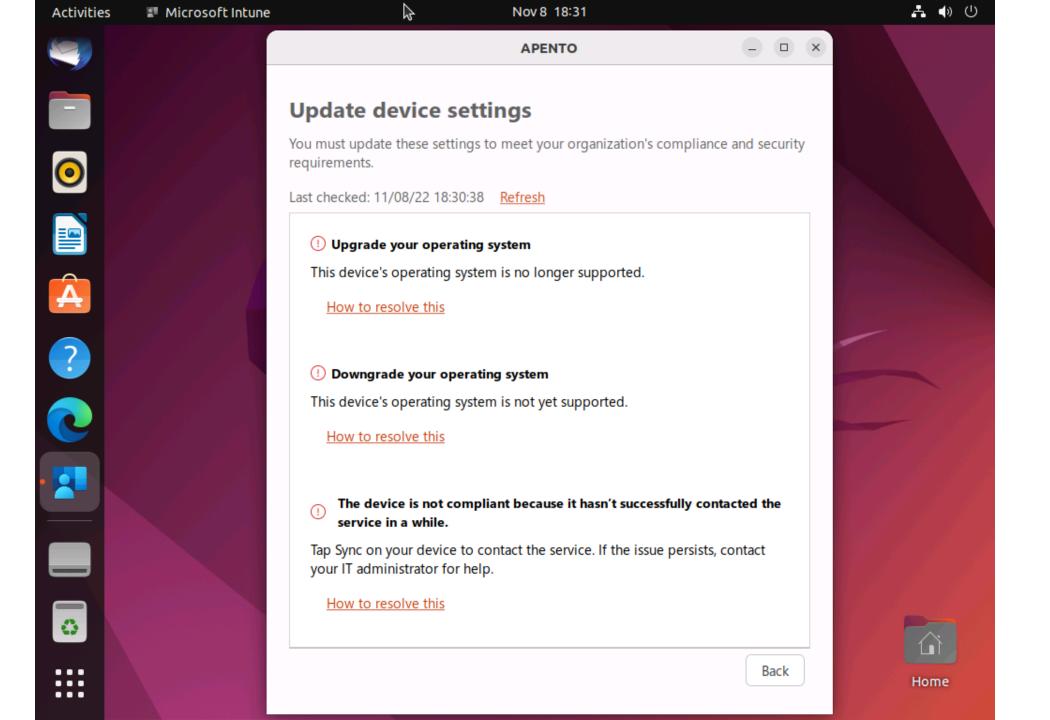

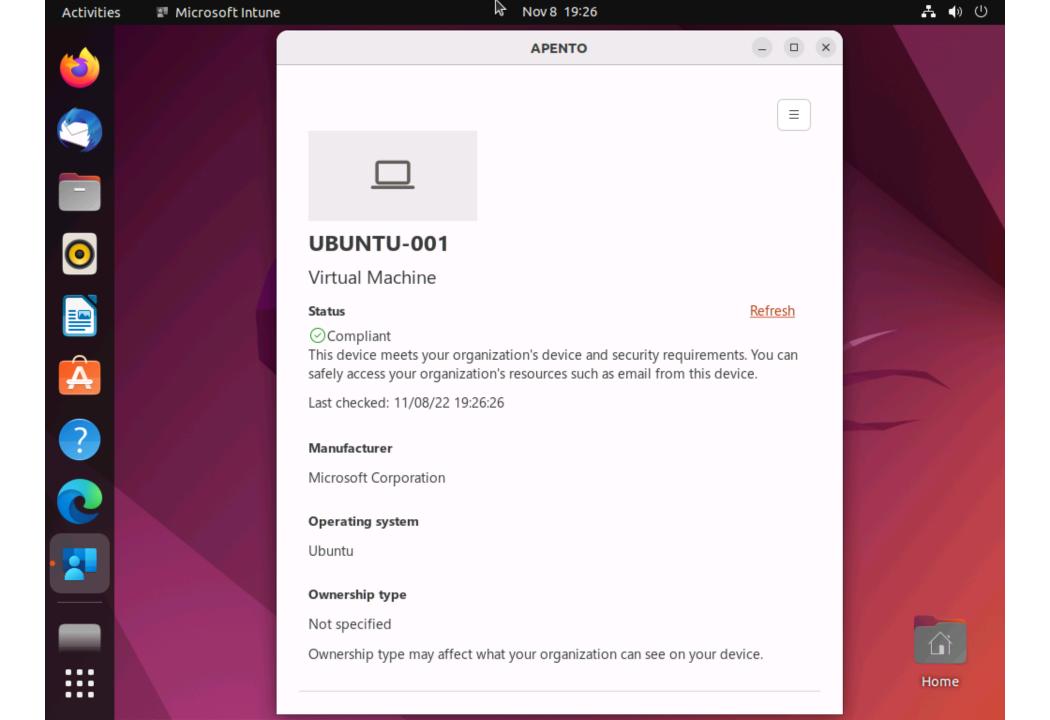

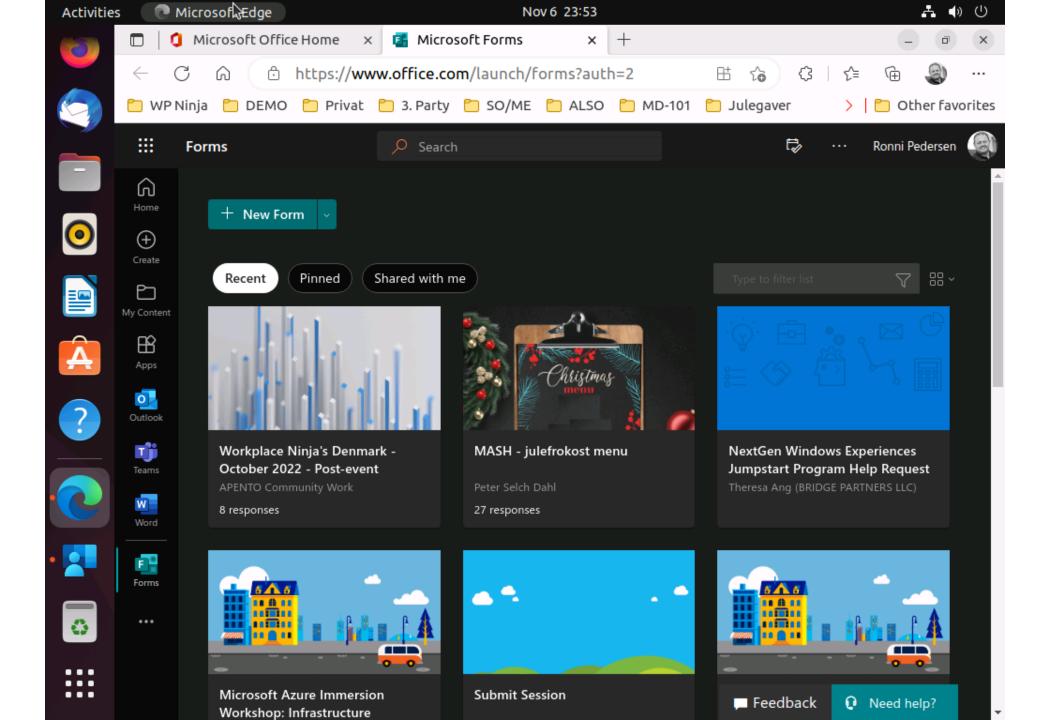

Block Linux Enrollment - Conditional Access (Workaround)

Google ChromeOS support

 Just after Ignite last month the Microsoft Intune team released support for Google ChromeOS in Microsoft Intune

What can we do?
